WE CARRY THE BRANDS OF THE WORLD

WELCOME TO OUR WORLD OF CARRY HANDLE TAPE

NRG Tapes is a dynamic self-adhesive tape company and specialist in the development and distribution of carry handle tapes with many years of experience and know how. We operate worldwide with a diverse product portfolio supplying you as our customer directly or via selected agents and distributors.

CARRY HANDLE TAPE

Carry handle tape adds more convenience and comfort for consumers in carrying all kind of packages for beverages, food, hygiene, dairy, etc. The usage of handles has proved that packs with handles have a shorter shelf life. It also results in significant cost reduction of shrink film expenditure by using lower thickness. The handle can hold packages up to 12 kilo (26lb). Our product group starts with the general transparent carry handle tape which can be combined with separate carton handles. Furthermore we offer customized carry handle tape with integrated handles according your specifications. NRG Tapes stands for high quality products and uses selected raw materials and ingredients.

Carry Handle Tape NRG 51H

We offer our transparent carry handle tape in 660, 5000 and 7000 meter rolls. It is made from a very strong mono oriented polypropylene film and specially designed hotmelt adhesive formula. This creates a high tack during the application onto the package and strong hold during carrying by the consumer. Furthermore it has proven excellent machinability on all handle applicators machinery.

INTEGRATED CARRY HANDLE TAPE

Whereas our 51H has separated handle cartons applied via the applicator our integrated carry handle tape has the handles already laminated onto the tape. We can laminate paper, polypropylene or polyethylene foam handles in different sizes. The pre-laminated handles are more precise positioned compared with the traditional handles. They create better machinability, higher production efficiency and look more attractive. The carry handle length can vary from 150mm to 500mm, the total tape handle from 250mm to 1000mm. We can print from 1 colour to full colour of your desired design, brand or logo. You are leading in this process determining the length and printing of the handle.

Carry Handle Tape NRG 51P

The tape has the same high quality specs of the transparent 51H product but the paper handle is already laminated onto the tape.

Roll dimension: 330, 3000, 3500 and 5000 meter

Carry Handle Tape NRG 51M

The tape has the same high quality specs of the transparent 51H product but the polypropylene handle is already laminated onto the tape.

Roll dimension: 330, 3000, 3500 and 5000 meter

Carry Handle Tape NRG 51F

The tape has the same high quality specs of the transparent 51H product but the polyethylene foam handle is already laminated onto the tape.

Roll dimension: 100 (flat roll) to max 1500 meter (depending on handle size)
